Multi-media is Passe! Visual Programming is Here!

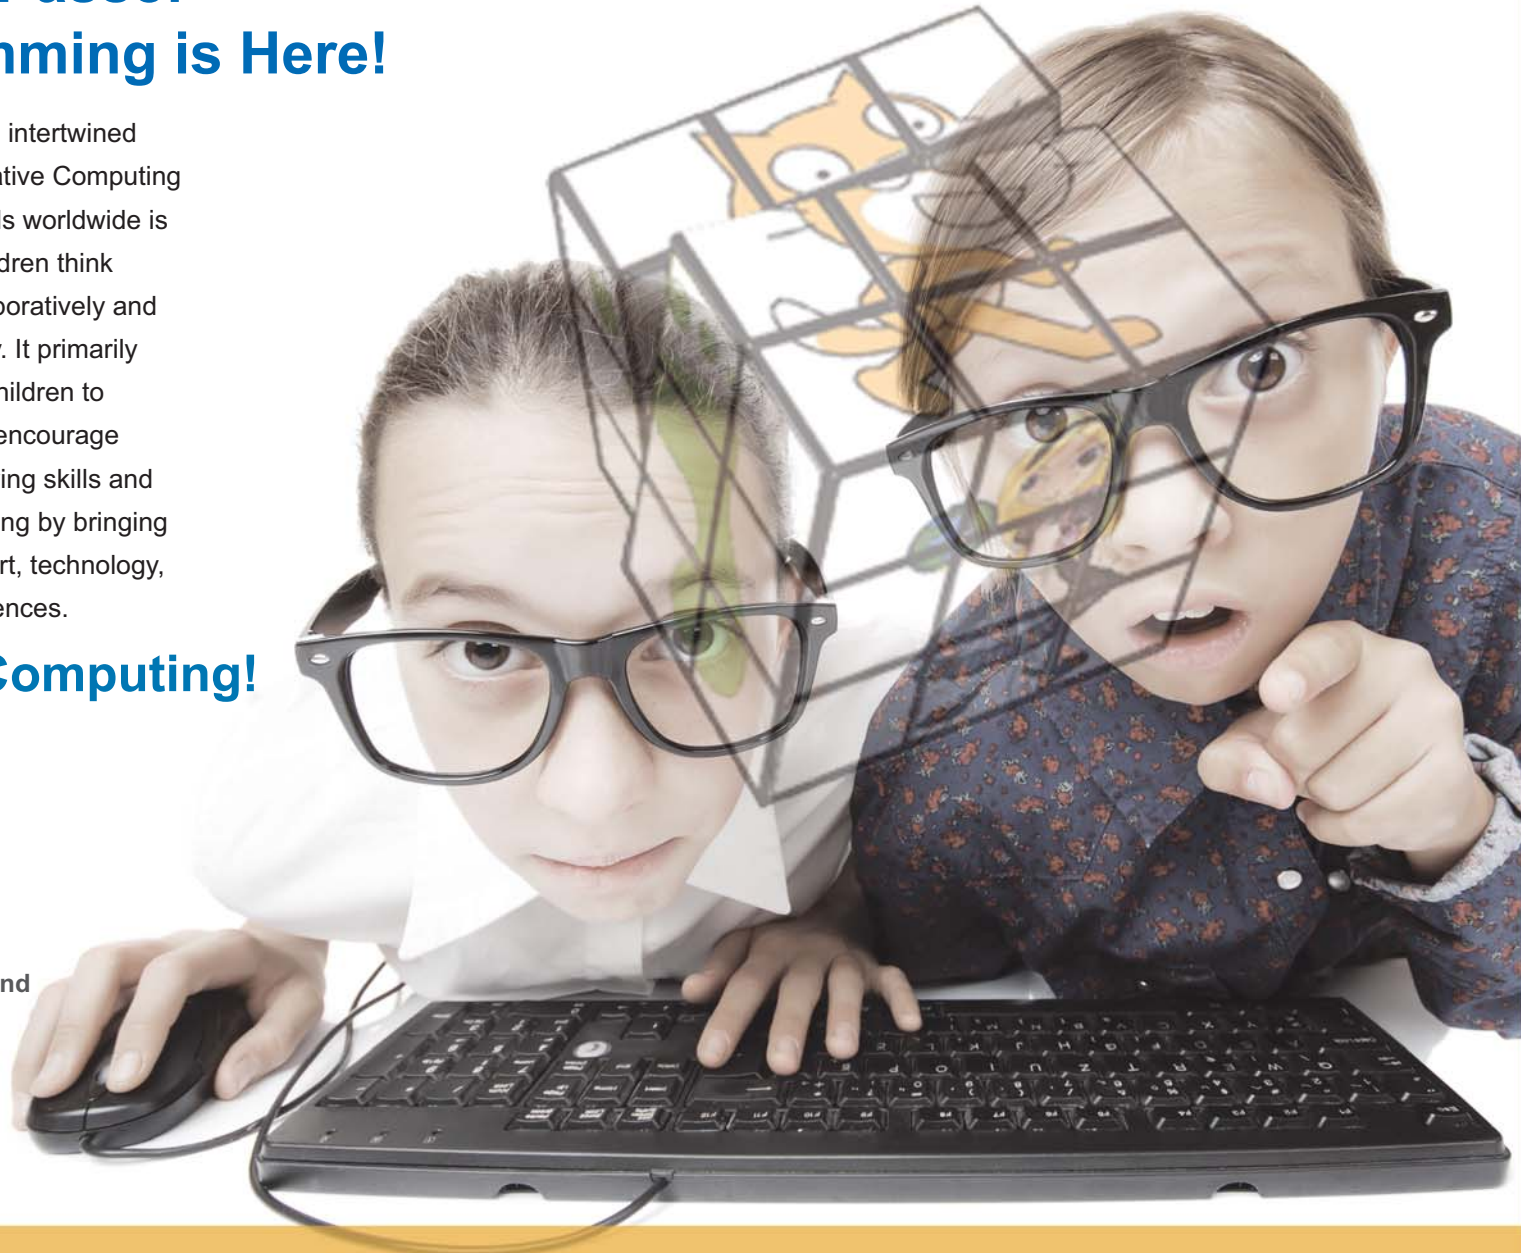

Future of Humanity is intertwined with Computing. Creative Computing followed in the schools worldwide is purported to help children think creatively, work collaboratively and reason systematically. It primarily allows the new age children to design on their own, encourage creative problem-solving skills and interdisciplinary thinking by bringing together ideas from art, technology, mathematics and sciences.

Future is Computing!

A Programming Language Designed and
Maintained by MIT Media Lab, USA.

Scratch interface is a visual programming approach designed to be intuitive. The approach followed is to cultivate and retain creative abilities in young children. Storytelling, drawing and games are the medium of exploration, experimenting and expression. Simply put we call it 'Creative Computing'.

Sri Gowthami is organising
**An Exclusive Seminar on
'FUTURE IS COMPUTING'**

Register Now. Entry Free

More Info about the Seminar Reach
Ms Janaki: 098665 17022.

FUTURE IS COMPUTING

**SRI GOWTHAMI
SMART SCHOOL**

Let Them Excel

Sri Gowthami has once again demonstrated a futuristic outlook by pioneering the implementation of 'Scratch Programming' in its school. 400 students of Sri Gowthami will be demonstrating their creative computing skills and talent at the Seminar - 'Future is Computing'.
